I was a former patient of Doctor Madinger in the Denver metro area in 2012/2016 while I was under harassment, and retaliation attack from the community starting with my residency in 2014 within the Community residency. At the time that I was being seen by Dr. Madinger, I was complaining about harassment but no one would take my complaints seriously enough for me to be able to identify them and put a stop to it. This was extremely affecting my mental health. Doctor Madinger was very well informed a prior incident with hate and retaliation from an experience from Oakland CA in 2005. I, in fact, made a promise to long walk home from Oakland to San Bernardino issued to the Attorney in the eviction May 20th 2006. This promise to long walk, would be a long aids walk of course. You see, Dr. Madinger as an individual patient, but did not progress this long walk to community interests like it should have. This long walk began September 21st 2013, the International Day Of Peace. The route of the walk would be over 500 miles.

This is all journaled at [ <http://alongwalkofbeauty.gruwup.net> : Great Reasons Us Will Unite Peace

Doctor Madinger knew that my walk was to correct the issues of extreme injustice from events in the long walk has its introduction. But by the time that the hate resurfaced in Denver to the same exact parameters nothing but let me suffer and referred me to the mental health interface that was available. This is extremely serious in that this retaliation efforts to disrupt and direct abuse into my life affected my

**What is a NPI Number?** : The National Provider Identifier (NPI) is a unique identification number for covered health care providers. The NPI is a 10-position, intelligence-free numeric identifier (10-digit number). This means that the numbers do not carry other information about healthcare providers, such as the state in which they live or their medical specialty. The NPI must be used in lieu of legacy provider identifiers in the HIPAA standards transactions. Covered health care providers and all health plans and health care clearinghouses must use the NPIs in the administrative and financial transactions adopted under HIPAA (Health Insurance Portability and Accountability Act).

**Where NPI should be used?** : The NPI must be used in place of legacy provider identifiers, such as a Unique Provider Identification Number (UPIN), Online Survey Certification & Reporting (OSCAR) and National Supplier Clearinghouse (NSC) in HIPAA standard transactions. There are two categories of health care providers for NPI enumeration purposes. Entity Type 1 providers are individual providers who render health care (e.g., physicians, dentists, nurses). Sole proprietors and sole proprietorships are Entity Type 1 (Individual) providers. Organization health care providers (e.g., hospitals, home health agencies, ambulance companies) are considered Entity Type 2 (Organization) providers.

**Who must obtain NPI?** : All health care providers who are HIPAA-covered entities, whether they are individuals (e.g., physicians, nurses, dentists, chiropractors, physical therapists, or pharmacists) or organizations (e.g., hospitals, home health agencies, clinics, nursing homes, residential treatment centers, laboratories, ambulance companies, group practices, Health Maintenance Organizations [HMOs], suppliers of durable medical equipment, pharmacies) must obtain an NPI. The NPI will be used by HIPAA-covered entities (e.g., health plans, health care clearinghouses, and certain health care providers) to identify health care providers in HIPAA standard transactions. A covered health care provider, under HIPAA, is any health care provider who transmits health information in electronic form in connection with a transaction for which the Secretary of Health and Human Services has adopted a standard, even if the health care provider uses a business associate to do so.
